PROFESSIONAL SUMMARY

Product Designer leading end-to-end enterprise SaaS redesigns, architecting intuitive AI interaction workflows, and engineering scalable design token systems. Proven track record of transforming complex legacy architectures into intuitive, high-adoption products (NuVeda 360, CALF 2.0, NU Coach) with measurable efficiency gains, 90% reduction in workflow creation time, and seamless cross-functional developer collaboration.

CORE COMPETENCIES

Product Design & UX:	End-to-End Product Architecture, User Flows, Journey Mapping, Usability Audits, Interactive Wireframes, Rapid Prototyping.
AI Systems & UX:	AI Interaction Models, Conversational Voice Roleplay UX, Non-Deterministic Feedback Loops, AI-Assisted Prototyping.
Design Systems:	Figma Component Architecture, Tokens Studio, 100% White-Label Theming Engines, WCAG 2.1 AA Accessibility Standards.
Engineering Synergy:	95% Design-to-Code Fidelity, Semantic HTML5/CSS3 Systems, Component Props Mapping, Developer Handoff Acceleration.

PROFESSIONAL EXPERIENCE

Product Designer · NuVeda Learning June 2025 – Present | India

Enterprise Learning Management Systems (LMS) & AI-Augmented Platforms

- NuVeda 360 (SaaS Unbundling):** Re-architected an unwieldy legacy survey feature into an autonomous commercial product; designed an intuitive AI setup wizard that **reduced survey creation time by 90%** and simplified buyer onboarding to under 3 minutes.
- CALF 2.0 (Flagship LMS Overhaul):** Led end-to-end UX redesign across 4 core user roles (Admin, Manager, Facilitator, Learner), resolving 60+ navigation bottlenecks and deep multi-tenant usability debt.
- Multi-Tenant White-Labeling:** Engineered a 100% white-label design token system allowing 100+ enterprise clients to instantly apply custom brand palettes and dark themes with zero engineering rewrites.
- NU Coach (AI Conversational UX):** Transformed a raw AI prototype into a gamified workplace coaching platform with conversational voice roleplay simulations, crisis scenarios, and daily streak mechanics.
- Design System Delivery:** Centralized components across web and mobile, **increasing dev velocity by 20%** with **95% handoff fidelity**.

UI/UX Designer · Phantasm Solutions July 2024 – January 2025 | India

Warehouse Management Systems (WMS) & E-Commerce Platforms

- WMS Operations Architecture:** Designed end-to-end interface for enterprise warehouse systems, streamlining real-time inventory counts, batch order dispatching, and logistics tracking.
- E-Commerce Funnels:** Built responsive e-commerce storefronts with optimized category filtering and multi-step checkout funnels that improved checkout completion rates.
- Design-to-Code Quality:** Partnered closely with front-end engineers to enforce design standards, achieving **90%+ visual and functional fidelity**.

Business Executive → UX Contributor · DBASE Solutions October 2023 – July 2024 | India

University ERP & Examination Platforms

- Campus User Discovery:** Conducted dozens of live campus demonstrations and faculty interviews, directly uncovering high error rates in university exam evaluations.
- Workflow Streamlining:** Designed wireframes and step-by-step task flows resolving confusing multi-tier navigation, **cutting user support tickets and error rates**.

EDUCATION

Bachelor of Technology (B.Tech)

Engineering Graduate · Andhra Pradesh, India

TOOLS & METHODS

Design: Figma, FigJam, Tokens Studio, Auto-Layout, Interactive Prototyping

Front-End & AI: HTML5, CSS3, Token Systems, AI Tools (Claude, Gemini, Lovable)
